

I am writing to ask you NOT impose the proposed rule change that would allow LPFM stations to take priority over current FM translator services. I listen regularly to the K-LOVE programming (in Phoenix, 105.5 FM) and believe that the radio broadcasts serves me and my community by bringing positive family-oriented programming and notifying me of events in my area. This is a service that is not duplicated on other radio stations in my area. My family and I listen regularly to K-Love and it has become a part of our life when we drive which is quite often. K-Love's programming and broadcasts serve the public interest by providing an alternative contemporary Christian music format that is not provided by other stations; notifies of local events geared around Christian concerts that are not covered by other stations; and also by focusing on new events that are of key interest to Christians and families that is not generally reported on other stations.

K-LOVE is the station that I can let my kids listen to 24 hours a day and not be worried about the content. On the contrary, I believe that the broadcasts are positive and encourage listeners to help them find direction in their life.
